## Response to Amendments

This action is in response to papers filed 19 December 2002 in Paper No. 18 in which the specification was amended to add pages 53 and 54. The amendments have not been entered for the reasons stated below.

The instant application filed 17 January 2001 did not contain pages 53 and 54. The instant application was filed with a preliminary amendment. The amendment added a first sentence to the specification reciting "This is a continuation of application Serial No. 09/515,124 filed February 27, 2000." This amendment is a complete and independent statement. This amendment does not incorporate by reference the disclosure of the '124 application. It is noted that the following paragraph (previously the first paragraph) cross-references other parent applications which are incorporated by reference. However, the preliminary amendment is a complete statement independent from the following paragraph. It is noted that a supplemental amendment filed 27 March 2001 replaces the first paragraph of the specification to recite all cross-referenced applications in a single paragraph and to incorporate the disclosures of those applications by reference. However, the amendment was submitted after the filing date of 17 January 2001 and therefore was not part of the specification-as-filed.

Petitions Examiner Hearns and Applicant point to MPEP § 201.06(c) for guidance on the contents of a continuation application.

In a continuation or divisional application, the safeguard (petition and fee under former 37 CFR 1.60(b)) concerning the filing of an application lacking all of the pages of the specification or sheets of drawings of the prior application has not been retained in 37 CFR 1.53(b) since the specification and drawings of a continuation or divisional application are not limited to a reproduction or a "true copy" of the prior application. As a safeguard, however, an applicant may

Application/Control Number: 09/760,897

Art Unit: 1634

continuation or divisional application-as-filed, a statement that such specifically enumerated prior application or applications are "hereby incorporated herein by reference." The statement may appear in the specification or in the application transmittal letter. The incorporation by reference statement can only be relied upon to permit the entering of a portion of the prior application into the continuation or divisional application when the portion of the prior application has been inadvertently omitted from the submitted application papers in the continuation or divisional application. The inclusion of this incorporation by reference of the prior application(s) will permit an applicant to amend the continuation or divisional application to include any subject matter in such prior application(s), without the need for a petition provided the continuation or divisional application is entitled to a filing date notwithstanding the incorporation by reference.

A priority claim under 35 U.S.C. 120 in a continuation or divisional application **does not amount to an incorporation by reference** of the application(s) to which priority is claimed.

For the incorporation by reference to be effective as a proper safeguard against the omission of a portion of a prior application, the incorporation by reference statement **must be included in the specification-as-filed**, or transmittal letter-as-filed, or in an amendment specifically referred to in an oath or declaration executing the application.

Mere reference to another application, patent, or publication is not an incorporation of anything therein into the application containing such reference for the purpose of the disclosure required by 35 U.S.C. 112, first paragraph. In re de Seversky, 474 F.2d 671, 177 USPQ 144 (CCPA 1973). See MPEP § 608.01(p).

The MPEP clearly states that the incorporation by reference of a parent application must be included in specification-as-filed and that a priority claim under 35 U.S.C. 120 does not amount to an incorporation by reference. The MPEP further states that the incorporation by reference statement permits applicant to amend the continuation application to add omitted portions of the specification.

Page 4

Application/Control Number: 09/760,897

Art Unit: 1634

In the instant application, the incorporation by reference of the parent application was not included in the specification-as-filed. While the instant application was filed with a priority claim under 35 U.S.C. 120, the MPEP clearly states that a priority claim is not equivalent to an incorporation by reference. Because the specification-as-filed does not incorporate by reference the '124 application and because the MPEP clearly states that only the incorporation by reference of the parent application in the specification-as-filed permits amendments to include omitted portions of the specification, the amendments of Paper No. 18 will not be entered.

Applicant's comments regarding the criticality of the missing pages is not deeded relevant to the guidance provided by the MPEP which clearly states that only the incorporation by reference of the parent application in the specification-as-filed permits amendments to include omitted portions of the specification.

## Conclusion

The examiner's Art Unit has changed from 1655 to 1634. Please address future correspondence to Art Unit 1634.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to BJ Forman whose telephone number is (703) 306-5878. The examiner can normally be reached on 6:30 TO 4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Jones can be reached on (703) 308-1152. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 308-4242 for regular communications and (703) 308-8724 for After Final communications.
